Develop your business case

You learn to analyze customer value propositions, to identify key risks and assumptions, to develop a validation and de-risking strategy, to build a venture plan and get connected to experts and funders

Venture Challenge winner Spring 2019: AmbAgon

Leiden, October 4th, 2019: SeraNovo Enters into License Agreement with Carna Biosciences for Development of Oral Formulation of Carna's Kinase inhibitor

SeraNovo B.V. today announced that it has signed a License Agreement with Carna Biosciences, Inc., a company engaged in drug development specializing in the development of kinase inhibitors. Under the agreement, the companies will expand their existing collaboration and jointly continue to develop an oral formulation with an increased bioavailability. Utilizing its proprietary Deep Eutectic Solvent (DES) formulation platform, SeraNovo is formulating one of Carna's proprietary drugs to increase its oral bioavailability. The DES formulation platform is based on constituents that are for oral administration or broadly used in the industry. The final formulation includes an optimized combination of a DES, one or more polymeric precipitation inhibitors and Carna's Kinase inhibitor.
